Victor Buck Services celebrates 25 years of innovation: enabling secure, seamless, and sustainable end-to-end document management and distribution

This June, Victor Buck Services (VBS) celebrates its 25th anniversary. To mark the occasion, an anniversary event was held on June 5 at the parent company's headquarters, the HELIX building of POST Luxembourg. The celebration brought together the VBS team, clients, partners, former CEOs, as well as representatives of POST Luxembourg.

For 25 years, VBS has offered document lifecycle services — from creation and production to multichannel distribution, and digital transformation — helping organizations manage and deliver critical communications securely, efficiently, and sustainably. Over the past quarter-century, VBS has grown in step with Luxembourg's dynamic and diversified economy.

From its roots in financial document processing, the company has evolved into an international trusted provider of secure end-to-end document management and distribution. As a subsidiary of POST Luxembourg, and with a footprint that spans Europe, Asia, and Australia, VBS helps businesses outsource their processes and enhance communication through tailored, hybrid

solutions.

“*This company was founded in 2000 with a clear and powerful ambition: to transform information management by combining technology, security, and customer proximity. From the moment I arrived 15 years ago, I was struck by the unique energy, the entrepreneurial spirit, and the vibrant culture within the team. There’s something truly special you feel when you walk through the doors of VBS—a cultural legacy we owe to those who built this company with vision and high standards. For the next 25 years, our direction is clear: investing in digital, security, automation, and artificial intelligence, while opening new distribution channels, exploring new markets, and strengthening our presence in Asia.*”, said VBS CEO Isabelle Alvarez.

“*In the early 2000s, the Group POST Luxembourg embarked on a strategy of diversification. Following its acquisition, Victor Buck Services quickly emerged as a true gem—a heavyweight within the Group portfolio. From the very beginning of our journey together, this has been a success story. I extend my heartfelt thanks and congratulations to all employees, as well as the valued VBS clients, for their unwavering commitment and trust.”*, said Claude Strasser, Chairman of the Board of Directors of VBS and Managing director of POST Luxembourg.
