

# Mixvoip announces the acquisition of Nomado's client portfolio

Mixvoip, a Luxembourg-based telecommunications and IT services provider, announces the acquisition of Nomado's client portfolio, a Belgian company specialized in communication services. This transaction is part of Mixvoip's growth strategy aimed at strengthening its presence in the Belux region and sustainably supporting businesses in the evolution of their telecom and IT needs.

As of March 2026, Nomado's clients will continue to benefit from their services under strictly identical conditions, with no interruption or operational changes. The teams responsible for account management, contractual terms, and contact channels will remain unchanged, ensuring a smooth and transparent transition.

*"This acquisition is fully aligned with our development strategy in the Belux region. From Luxembourg, we are committed to ensuring complete continuity for Nomado's clients, while gradually giving them access to Mixvoip's broader portfolio,"* explains Loïc Didelot, CEO & Founder of Mixvoip.

Through this acquisition, Nomado's clients will gain access to the full range of solutions offered by Mixvoip: Cloud telephony (PBX), SMS APIs, integrated mobile telephony, Internet connectivity, cybersecurity services, and IT solutions tailored to modern professional environments.

Mixvoip continues its growth while strengthening its position as a leading technology partner for Luxembourgish and European businesses.
