

Mixvoip joins the Odoo Community Association as a Gold Sponsor

Mixvoip, a telecommunications and IT provider headquartered in Luxembourg, has joined the Odoo Community Association (OCA) as a Gold Sponsor, supporting the collaborative development and long-term sustainability of the Odoo open-source ecosystem.

With this partnership, Mixvoip becomes the only Gold Sponsor of the OCA based in Luxembourg. This initiative reflects Mixvoip's commitment to strengthening a balanced and sustainable Odoo ecosystem for businesses, integrators, and contributors.

Supporting a sustainable and balanced Odoo ecosystem

Mixvoip believes that Odoo's strength lies in a model where openness and transparency coexist with long-term investment in stability, security, and scalability.

"When both dynamics coexist, the platform benefits from sustained investment in reliability and security, while maintaining the openness that enables integrators and the community to extend Odoo with practical, real-world solutions," said Loïc Didelot, CEO of Mixvoip.

From Mixvoip's perspective, this balance combines long-term investment (maintenance, security, performance) with the open-source dynamic (adoption, contributions, and practical extensions),

creating a stronger ecosystem for all stakeholders.

Regulated telecommunications expertise for Odoo environments

Operating in Luxembourg, Belgium, France, and Germany, Mixvoip provides telecommunications and IT services to more than 5,000 businesses and organisations. The company delivers fully regulated and compliant VoIP services in over 20 countries, ensuring number portability guarantees and strict alignment with national and European telecom regulations.

Within this framework, Mixvoip has developed advanced telephony solutions designed for organisations that rely on Odoo as a central platform for business-critical processes.

Voxbi Cloud PBX : advanced telephony integration for Odoo

- Mixvoip offers deep integration between Odoo and Voxbi Cloud PBX, enabling users to: place and receive calls directly from within Odoo,
- automatically log call activities in contact and opportunity records,
- generate AI-powered call summaries using Mixvoip's internally developed and hosted artificial intelligence.

The integration is compatible with Odoo Online, Odoo.sh, and self-hosted environments, allowing fast deployment regardless of technical infrastructure.

In the coming months, Mixvoip also plans to introduce a licensing model not based on per-user fees, making advanced VoIP integration more accessible, particularly for organisations using the Odoo Community edition.

A positive signal for the Odoo ecosystem

Mixvoip's commitment as a Gold Sponsor strengthens the OCA's momentum and sends a clear message to the community: companies delivering essential and regulated services recognise the value of an open, structured, and sustainable Odoo ecosystem.

"Mixvoip's support enables us to invest in very concrete initiatives: the OpenUpgrade project, the OCA website and database, the technical resources (tools and infrastructure) and the operational team," said Julie LeBrun, Executive Director. *"It strengthens the reliability of the ecosystem in day-to-day operations and gives greater visibility to the community's work in 2026."*
