

Sertalink, new Platinum member of LU-CIX

With the financial sector constituting the backbone of Luxembourg's economy and facing an escalating number of sophisticated cyber threats, the local availability of expert cybersecurity services is more critical than ever. The implementation of stringent European regulations like the NIS2 Directive and DORA presents a significant challenge for many organisations, demanding a proactive and comprehensive approach to digital operational resilience. Sertalink's new presence in Luxembourg directly addresses this need, offering specialised consultancy and services such as NIS2 assessments, penetration testing, and 24/7 Security Operations Center (SOC) monitoring. This local foothold enables Sertalink to provide the hands-on, tailored consultancy and support that Luxembourg's B2B market, particularly its vital financial and critical infrastructure sectors, requires to not only achieve compliance but also to build a truly resilient and secure digital future.

“Joining the LU-CIX community is a cornerstone of our commitment to the Luxembourg digital ecosystem. For Sertalink, this is more than a peering opportunity; it is about embedding ourselves within the heart of Luxembourg's most respected community and contributing to its collective security and resilience. We believe that a secure digital environment is a shared responsibility. By becoming an active member of LU-CIX, we aim to collaborate closely with fellow members, share our deep expertise in cybersecurity, and help fortify the network that is so vital to Luxembourg's economy and its future as a leading digital hub. We are proud to be part of this community and look forward to building a more secure and trusted digital space together”, states Selim Ourtani, Sertalink's CEO.

“Sertalink is a Cybersecurity expert specialized in helping build resilient organisations with market niche and disruptive technologies. Already very committed into the ecosystem, Sertalink will also be present at the Luxembourg Internet Days event to be held on November 17 & 18 to show up their solutions and expertise. We are glad to welcome Sertalink into the LU-CIX Internet community, and doing so, to contribute to strengthen future-proof local businesses.” declares Frédérique Ulrich, Director of LU-CIX ASBL.
