Luxair announces Riga as new destination for Summer 2027

Fly direct from Luxembourg to the Latvian capital twice weekly from 3 May 2027.

Luxair will launch a new summer connection between Luxembourg and Riga on 3 May 2027. The route will operate twice weekly, on Mondays and Fridays, until the end of October 2027, establishing the first direct flight connection between Luxembourg and the Latvian capital.

The largest city in the Baltic states, Riga combines centuries of history with a vibrant cultural scene. Its medieval Old Town, a UNESCO World Heritage Site, and one of Europe’s richest collections of Art Nouveau architecture make it an ideal city-break destination. The white-sand beaches of J? rmala and the forests of Gauja National Park are also within easy reach. Long summer days and a packed calender of open-air events make the warmer months the perfect time to discover the city and its surroundings.

The new route responds to significant demand for travel between the two capitals, particularly during the summer months. Until now, passengers have had to rely on connecting flights. The new direct service will offer a faster and more convenient way to travel, whether for holidays, business or visiting friends and relatives.

The route will be operated with Luxair's new Embraer E195-E2 aircraft, offering passengers a modern and comfortable travel experience. With its spacious cabin, superior comfort and complimentary onboard catering, the E195-E2 reflects Luxair's commitment to quality service. Combined with Luxair's transparent fare offering, passengers can enjoy a pleasant journey with the essentials included and no unpleasant surprises.

Thomas Fischer, Chief Commercial Officer of Luxair, states: *« With Riga, we are opening the door to the Baltics for our customers and adding another attractive city-break destination to our summer programme. The demand is clearly there, and our new direct flights will make travelling between the two capitals simpler, faster and more convenient. With our new Embraer E195-E2, we are also bringing a high level of comfort and our signature onboard service to the route. This new connection is the result of a close and constructive partnership with Riga Airport, with whom we have been working on this project for some time. I would like to sincerely thank them and all the teams involved for their dedication in bringing this project to life. »*

Laila Odi?a, Chairperson of the Board of RIX Riga Airport, commented: *» The arrival of a new airline at Riga Airport is always a significant milestone, demonstrating the dedicated efforts of both the airport and our partners to expand our route network and strengthen Latvia's international connectivity. We are delighted to welcome Luxair to Riga Airport and look forward to launching the first direct connection between Riga and Luxembourg next spring. This route will enhance economic and tourism ties between our two countries while providing passengers with a faster and more convenient travel experience. »*

The new Luxembourg–Riga flights will be available for booking from 24 November 2026 on luxair.lu and through the usual sales channels. Fares start at €159 in Light Fare, including one cabin bag, and at €199 in Smart Fare, which offers greater flexibility, including one cabin bag, one free checked bag per person and the possibility to change the booking.
