

LuxNetwork, first Diamond member of LU-CIX

LU-CIX is pleased to announce that LuxNetwork has elevated its membership status from Platinum to Diamond. LuxNetwork has been a long-standing Platinum Member of LU-CIX for over 10 years and this upgrade marks a natural progression in its continued support and active involvement in the Luxembourg Internet ecosystem. LuxNetwork, a privately-owned global provider of Internet, MPLS, wavelength and Datacenter services, reinforces its commitment to LU-CIX and the local digital economy with this step forward. “Our experience at LU-CIX has led us to be convinced of the importance of having an Internet exchange platform. We are guided by its values of sharing and collaboration. Becoming a LU-CIX Diamond member reflects our strong commitment to LU-CIX.”

Luc Lutot, CEO of LuxNetwork

“We’ve created a brand new « Diamond » membership package for members who want to further support LU-CIX ASBL and enable us to launch even more initiatives for the security and resilience of the Internet ecosystem. The community spirit is very strong at LU-CIX, as we operate in a niche market in which every player counts and is a link in the same chain weaving the local and European Internet network. LuxNetwork is one of our most loyal members and never misses an opportunity to collaborate with LU-CIX, whether it is through technical collaboration using our services to optimize its operator activity, among others, or through involvement in our various promotional activities. This membership upgrade is a new milestone that, as a non-profit organization, we highly appreciate.”

Frédérique Ulrich, Director of LU-CIX ASBL
