

Crescera Solutions joins the LU-CIX community

Crescera Solutions is a new company committed to digital transformation. Founded in February 2025 by Nasséra Aïci and her forward-looking vision, Crescera Solutions is a Luxembourg-based company that offers personalized consulting and professional training services with experienced professionals to support businesses in their digital transformation.

The company stands out for its dual expertise:

- Digital transformation consulting (audit, strategy, IT modernization)
 - Certified and personalized professional training focused on technological and managerial skills.
- Crescera Solutions favors a human-centered approach, combining methodological rigor (diagnosis, co-construction, support, evaluation) and skills development to ensure the lasting impact of its projects.

With the ambition of becoming a leading player in Luxembourg as well as at the international level, the company also aims to bridge the digital divide by devoting resources to training audiences who are excluded from digital technology.

“We are delighted to welcome Crescera Solutions to the growing LU-CIX ASBL community. Their contribution will help our members raise the bar and enhance their employees’ skills to support digital transformation in an ever-evolving world.” says Frédérique Ulrich, Director of LU-CIX ASBL.

“At Crescera Solutions, we believe that successful digital transformation relies primarily on the women and men who drive it. Integrating LU-CIX will allow us to strengthen the skills and competitiveness of an entire ecosystem.” States Nasséra Aïci, Founder of Crescera Solutions.
