

Deloitte Luxembourg strengthens and expands its AI Practice

The Firm welcomes Cédric Jadoul as Partner to lead Intelligent Automation.

Deloitte Luxembourg is pleased to announce the appointment of Cédric Jadoul as Partner to lead its intelligent automation practice. He will guide the Firm's AI and automation strategy, with a particular focus on agentic AI, further reinforcing Deloitte's role as a trusted partner in business transformation.

As organisations confront unprecedented challenges and rapid technological disruption, Deloitte enables clients to modernise existing systems, adopt new technologies, and accelerate digital innovation. By combining operational excellence with forward-looking solutions, the Firm helps improve financial performance, unlock new business opportunities, and drive sustainable growth.

In his new role, Jadoul will advance Deloitte's intelligent automation capabilities, particularly in the fast-developing field of agentic AI. He will primarily support clients in the European Institutions as well as other public and financial organisations. Jadoul joins a strong AI practice led by partners Nicolas Griedlich, Ali El Maghraoui, and Maurice Schubert, consolidating Deloitte's position as a leader in AI-enabled business transformation.
